Robin – Look what Dianna Lim turned up on IAs with USGS. My question is who is the PO on this IA, what program is it with and what is the scope, etc. Just wondering if we can tag on to this one or maybe we still want to start a new one for UA.

Welcome back – would love to hear about your trip sometime. Lets do lunch when we're both back in the office.

Dianna – Can you (or someone) tell me which agency this IAG for technical assistance in Cement Creek is with? I am not aware of this IA – could it be with the Removal Program? And that is good news about the special account \$\$ in the Upper Animas – when did that come thru? B/c not that long ago, there wasn't that amount available.

And was this \$180,000 in addition to pipeline \$\$ that was recently approved? Not to be greedy – just wanting to know how to plan b/c we will use it.

Subject: Upper Animas and Upper Cement Creek

HI,

Below is the financial information for Upper Animas and Upper Cement Creek.

In summary:

Upper Animas has an available balance of \$180,778.12 in special account and there is no open obligation for the Generic PA/SI and Site Reassessment activities.

Upper Cement Creek has an available balance of \$58,524.98 in special account with \$7,563.32 open obligation (TR2B) for the Technical Assistance (TA) under an IAG. I am not sure what the status of this IAG is, but we should look at expending this out to zero before we move on with the movement of the balance from this account to the Upper Animas as discussed this morning.

Thanks

Dianna
